# REWTHERAP IMPROVE SICKLE CELL ANAEMIA CARE OUTCOMES

ASHISH SRIVASTAVA @ New Delhi

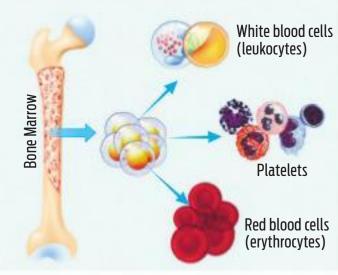

ICKLE cell anaemia (SCA) is a genetic blood disorder that affects millions worldwide. Traditionally, managing this condition has been challenging, but recent breakthroughs in medical research have paved the way for innovative treatments. According to experts, continuous re-

search has seen promising developments in therapies other than traditional bone marrow transplant. Gene therapy, like CRISPR-based approaches, aims to correct the underlying genetic mutation causing the disease.

Besides, targeted drugs, such as voxelotor and crizanlizumab, focus on modifying specific aspects of the disease process to alleviate symptoms and improve outcomes. These advancements bring in more effective and personalised treatments for individuals with sickle cell anaemia. "Sickle cell anaemia is a genetic anomaly which is filled by autosomal recessive disorder. Here the parents are the carriers and there is a 25% chance that they will pass it down. The permanent cure for the disease is bone marrow transplant. The best option is a full match donor. Otherwise, half match transplant can be done with good outcomes," said Dr Vikas Dua of Fortis Memorial Research Institute, Gurugram.

Dr Preeti Rastogi, director and HOD, obs and gynae, Medanta, Gurugram, said sickle cell disease poses a significant threat to both maternal and foetal well-being during preg-

## **BONE MARROW TRANSPLANT**

nancy. Complications may include high risk of pre-eclampsia, preterm labour, growth retardation in the baby and high likelihood of miscarriage. Speaking on new therapeutic options available, Dua said, "We have new therapeutic options like gene therapy. Though they are very expensive, they are new kids on the block. For now, the most accessible and efficient cure for sickle cell anaemia remains bone marrow transplant." "The cost of bone marrow transplant ranges between ₹12 lakh - ₹18 lakh, while the gene therapy may run into crores for a patient," he added. To manage the disease, a multidisciplinary team approach is paramount, beginning with prepregnancy counselling. "Obstetricians play a crucial role in optimising women's health before conception by addressing anaemia, check-

## **LATEST INTERVENTIONS**

**GENE THERAPY:** Involves modifying the patient's own cells to correct the genetic mutation responsible for sickle cell anaemia (SCA). Experimental trials have shown encouraging results, with some patients experiencing a

significant reduction in symptoms and improved quality of life. Although it is still in the early stages, gene therapy holds great potential for transforming the landscape of SCA treatment

**CRISPR TECHNOLOGY:** The revolutionary CRISPR-Cas9 gene-editing technology has opened new possibilities for

treating SCA. Researchers are exploring ways to precisely edit the

defective genes responsible for abnormal haemoglobin in sickle cell patients. Early studies have demonstrated success in modifying the genes of hematopoietic stem cells, the cells that develop into blood cells, offering a potential long-term solution for individuals with SCA

**FOETAL HAEMOGLOBIN INDUCTION:** Foetal haemoglobin (HbF) has been identified as a naturally occurring form of hemoglobin that can inhibit the polymerisation of sickle

haemoglobin. Recent research has focused on developing drugs that stimulate the production of foetal haemoglobin in adult patients. These drugs aim to reduce the severity of symptoms and complications associated with SCA by increasing the presence of HbF, which has shown promise in preclinical trials

**ANTI-ADHESIVE THERAPIES:** Vaso-occlusion, the blockage of blood vessels by sickle cells, is a hallmark of SCA. New treatments are targeting the adhesion of sickle cells to blood

vessel walls, preventing the formation of clots and improving blood flow. Anti-adhesive therapies, including monoclonal antibodies and small molecule drugs, are being investigated for their potential to reduce pain crises and other complications associated with vaso-occlusion

ing fertility status and managing comorbidities," she said.

"Advanced prenatal investigations, such as chorionic villus sampling and DNA analysis. enable us to assess the status of the baby early in gestation. Later trimester options include immunosynthesis and additional DNA analysis or foetal blood sampling. It's important to note that while the condition itself cannot be prevented, optimising women's health through close supervision and appropriate measures can significantly reduce the risks during pregnancy and labour," Rastogi added.

## **PRE HOSPITAL CARE**

## Ambulance with advanced life support improves survival rate by up to 20%

SINDUJA JANE @ Chennai

RE-HOSPITAL care is very crucial for any patient to reduce mortality, say doctors. The Golden Hour management starts the moment a patient lands in a health emergency – like road accident, heart attack, stroke, sepsis, asthma or any life threatening illness.

Pre hospital care is highly specialised nowadays, including advanced medical technology and mobile medical units which includes life saving equipment like defibrillator, ventilator, monitors, infusion pumps, suction apparatus, oxygen cylinders, ECG, glucometer and medications required during transfer of critically-ill patients.

"Paramedics hired in Tamil Nadu are trained to provide immediate and critical care under the guidance and supervision of doctors, either monitored remotely or travelling along with the patient in the ambulance, has improved the care of critically-ill patients before they reach the hospital for actual treatment," said Dr S Saravana Kumar, president, Society for Emergency Medicine

Dr T S Srinath Kumar, Academic Council Chair, Society for Emergency Medicine India said, Emergency Services can be divided into three parts. It starts with the care given to the patient before they reach the hospital, which is given from the home, ambulance or road side. The second part is in the emergency department where patients are triaged depending on the care they need - they will be taken to a resuscitation zone which is called as red zone, or yellow or green zone where walk-in patients are received.

## LIFE SAVERS

### **DEFIBRILLATORS**

Used to apply electric charge to the heart to restore normal heartbeat, if the heart rhythm stops

## **INFUSION PUMP**

A device used to deliver fluids into a

## **SUCTION APPARATUS**

patient's body in a controlled manner

Used to take out fluids like vomit, blood, saliva, serum or other secretions or gases from the body cavities

## **GLUCOMETER**

To measure glucose level in the blood

"The Society for Emergency Medicine India released the document on quality upgrade enabled through space technology 'Excellence unveiled: A comprehensive guide to quality standards and practices in emergency department - Learnings from ISRO,' which acts as an implementation tool in emergency department," said Dr Saravana.

"The first established network of ambulances was started by Apollo group of hospitals with the dedicated number 1066. Later, the first public-private partnership with state governments began with integrated services under the umbrella of 108 with protocol based which saw the change in giving care to the needy," said Dr Srinath.

The consensus from members of the society for emergency medicine is that patients shifted through advanced life support ambulances had a 20% higher survival rate than patients transported to medical care facilities in other vehicles. It will not be far away when we can monitor patients remotely and live stream from ambulances with point of care devices.

## BANGALORE DEVELOPMENT AUTHORITY T. Chowdaiah Road, Kumara Park West, Bangalore - 560 020 No. BDA/EM/EE/ID/TENDER/PRR-210/2023-24 Date: 25.01.2024

## **Development Of Peripheral Ring Road to** Bengaluru City Under Public Private Partnership

The Bangalore Development Authority, Government of Karnataka (hereinafter referred to as the "Authority"), is the nodal agency for the development of the Bangalore region by providing various civic amenities, quality infrastructure and as part of this endeavour, the Authority has decided to undertake Development of Peripheral Ring Road to Bengaluru City ("Project") through Public Private Partnership ("PPP") on Design, Build, Finance, Operate and Transfer ("DBFOT") basis. In this regard, the Authority is desirous of selecting the Concessionaire through a transparent and competitive bidding process.

Name of the work: Development of 8 lane Peripheral Ring Road with service road to Bengaluru City for approx. length of 74 km and in RoW vidth of 100m.including cloverleaf junctions, flyovers/underpasses ROBs, RUBs, vehicular underpass/overpasses, Toll Plazas, transport zones, culverts, minor and major bridges, utility ducts along and across the road, green corridor with operation and maintenance for a lease period of 50 years on revenue sharing basis through PPP mode (Design. Build, Finance, Operate and Transfer DBFOT) along with funding the land acquisition cost for 2560 Acres (Approx). EMD Rs. Crore: 270.00.

The Authority invites proposals ("Bids"] through e-tendering mode from Interested parties ("Concessionaires") in accordance with the Request for Proposal ("RFP"). The RFP document containing instructions to Bidders, criteria for qualification and criteria for evaluation may be downloaded from the Karnataka Public Procurement Portal of Government of Karnataka ("Gok") viz. https://kppp.karnataka.gov.in and the Bids shall be submitted as per the provisions of the RFP. Important Details: RFP, Issue Date: 29.01.2024, Submission of bid queries 07.02.2024 at 16:00 Hrs IST, Pre bid meeting Date: 09.02.2024 at 16:00 Hrs IST, Last Date for submission of bids:29.02.2024 upto 16:00 Hrs IST, Opening of Technical Bids: 02.03.2024 at 16:30 Hrs 1ST.

Project: Bangalore, Proponent: Development Authority, Contact Person: Executive Engineer, Address: Bangalore, Development Authority, Government of Kamataka, T.Chowdaiah Road, Kumarapark West, Bangalore-560020. Phone: 080-2334 0258, E-mail: bdaeepm@gmail.com, Transaction Infrastructure, Advisor : Development Corporation (Karnataka) Limited (DeCK), Contact Person Address: Divakaran K, Address: 9/7, K.C.N. Bhavan, Yamunabal Road, Madhavanagar Extension, Off Race Course Road, Bangalore-560001, Phone: +91 80 4344 000/33, 9739080400, E-mail: divakaran.k@ideck.in.

Note: Bangalore Development Authority reserves the right to cancel the invitation and/or invite fresh Bids with or without amendments to this invitation, without liability or any obligation for such invitation and without assigning any reason.

Sd/- Engineer Member, BDA, Bangalore
